BALCO has successfully completed its first ever trial of **biofuel** application for **Ladle preheating** at **Potline Ladle Cleaning Shop (LCS)**.

The use of biofuel for Ladle preheating will contribute towards declining **CO2 emissions upto 70 per cent**.

The achievement has bolstered our organization's strong stride to decarbonize its operations in line with the company's commitment to reduce carbon emissions to zero by **2050** or sooner.
