It is difficult to imagine life without iron and steel, which is made from iron. Our homes, our vehicles, our gadgets, all require iron and steel.

Today, India is the 4th largest producer of Iron Ore in the world with a total output of 270 million tonnes per year. Only Australia, Brazil and China produce more.

Given our huge reserves, we can produce 700 million tonnes per year and become the 2nd largest after Australia.

The benefits this will bring to Bharat in terms of economic growth, jobs and revenue to government are massive. It will also lead to rapid development of states rich in iron ore like Chhatisgarh, Jharkhand and Odisha. At present, their per capita incomes are below the India average but, with their huge potential below the ground, can easily have double the India average.

Let us be visionary and think big.
