DPS BALCO

Nurturing Young Minds
for a Brighter Tomorrow

CHAIRMAN CORNER

Anil Agarwal  @AnilAgarwal_Ved · 1h 

The world is quickly gearing up for the needs of a low-carbon future.

India has vast reserves of untapped critical minerals like copper, lithium, nickel, zinc, and silver. If harnessed appropriately, India has the resources to power EVs, build out massive renewable energy infrastructure, and develop and deploy greener technologies that are essential for our future.

But it's not just about what we have – it's about who we work with, and how we use these resources.

By focusing on sustainable mining and joining hands with global partners, India can take the lead in building a greener, brighter tomorrow. The demand for these minerals is skyrocketing, and the time to act is now!

Series On HPV Vaccination

A step towards defeating
Cervical Cancer!

FAQ
02

But why do we
take the **HPV**
vaccine for
cervical cancer?

ANSWER

HPV (Human Papillomavirus) is a widespread virus responsible for over 99% of cervical cancer cases. Most HPV infections are self-limited and are asymptomatic or unrecognised, however, some can persist and cause cellular changes in the cervix. If left untreated, these changes may lead to cancer.

Stay tuned to get more information on HPV Vaccination
